

### Results from trial:

- ✓ Improvement of root system
- ✓ Better resistance against sugar rot
- ✓ Higher quality harvest
- ✓ Uniform flowers
- ✓ Stronger stems

**Product:** Maxstim for Ornamentals

**When:** Monthly

**Where:** Hungary

**Application rate:** Initial application of 10 litres for 2 applications. Then 10 litres per hectare every four weeks

Some beautiful pictures of gerberas from a grower demonstrating the improvement of their crop following the use of Maxstim.

After 2-3 applications, clear indications that plants were becoming healthier began to develop. Leaves were clearly greener, with higher quality, larger flowering.

Flowers were consistently larger in size

Root systems showed improvement

An increase in flower quality and consistency were commented on by the grower
