

## Technical Data Sheet

### Product Identification

Trade Name	Maxstim Mycorrhizal Fungi
Product Type	Mycorrhizal Fungi
Chemical Composition	100% arbuscular mycorrhizal fungi in equal proportions and spores of extomycorrhizal fungi
Origin	All fungi are produced in the United Kingdom

### Mycorrhizal Fungi Standard Mix

Funneliformis mosseae (Glomus mosseae) Inoculum (see below carrier)	16.6%
Funneliformis geosporus (Glomus geosporum) Inoculum	16.6%
Claroideogloium claroideum (Glomus claroideum) Inoculum	16.6%
Rhizophagus intraradices (Glomus intraradices) Inoculum	16.6%
Glomus microragregarum Inoculum	16.6%
Diversispora spp inoculum	16.6%
Scleroderma citrinum (spores)	0.18%
Bioadditives	0.22%
Innoculum (growing substrate)	
Pumice	50%
Zeolite	50%
Bulk Density	0.9
Particle grade	1-3mm
