Farnham Golf Course

Farnham Golf Club sees a 52% increase in root length across all treated greens

Maxstim Products

Maxstim Sport Turf is a complex biostimulant with a wide range of bioactive components including our unique bioflavonoids and polyphenols, creating better root development and better resilience to wear and tear.

CynosaTM contains ortho silicic acid enabling plants to assimilate silicon to strengthen plant structures and increase resistance to disease.

Golf Course Surveys and Treatments

Maxstim now partners with numerous golf clubs across the **UK and Europe** helping them to grow, maintain and improve their courses providing **superior root length development and protection from disease**. Our local course, Farnham Golf Club has undertaken an extensive Maxstim application program that has seen impressive results over the past few years.

Prior to the introduction of the treatment programme, extensive root surveys were sampled across the whole course, in areas that were designated to be a control or treated with **Maxstim complex biostimulants**. These measures were repeated in June 2022.

A spraying programme of **20 L/ha for Maxstim Sport Turf** and **4 L/ha of Cynosa** was applied fortnightly during growing months and monthly during dormancy.

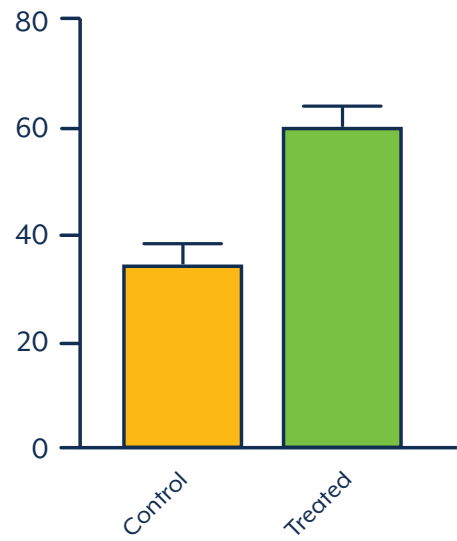

Core Measurement Results

Core measurements showed an overall **increase of 52% in root length**, which was a significantly larger development than control areas.

The benefits of an improved root mass include:

- ✓ Increased plant health
- ✓ Better endurance of stress and disease
- ✓ Improved plant colour
- ✓ Reduction in additional nitrogen applications
- ✓ Reduced use of fungicide treatments

% Increase Sept 21 - Jun 22

52%

length

Conclusion

The combined use of Maxstim Sport Turf and Cynosa means golf courses can achieve significantly improved root length, and subsequently healthier and more resilient turf.

Testimonials

Thank you for steering me towards your excellent product and yes, we are definitely seeing some excellent results.

Rupert Lawrence

Head Green Keeper,
Farnham Golf Club
