

Stronger roots, faster harvests, more efficient turf sod production

Only 7–8 months from sowing to harvest — trusted worldwide for turf sod production and the construction of stadium pitches.

Turf Sod needs to produce consistent and uniform root growth to produce a strong sward for the harvester, the grower and the end user.

Maxstim Turf and Cynosa combine to produce exactly what is required for:

- ✓ Fast growing crops with reduced time to harvest
- ✓ Increased root growth and sod strength from lateral root growth
- ✓ Improved crop vigour and faster homogeneous germination
- ✓ Better disease and abiotic resistance
- ✓ Improved nutrient use efficiency, (NUE) improves plant metabolism
- ✓ Stronger leaf, stem and root structures

Dense, uniform 8-month old turf sward

A thick, even sward with excellent shoot density and colour.

Washed underside showing exceptional root mass

Extensive lateral root growth throughout the profile.

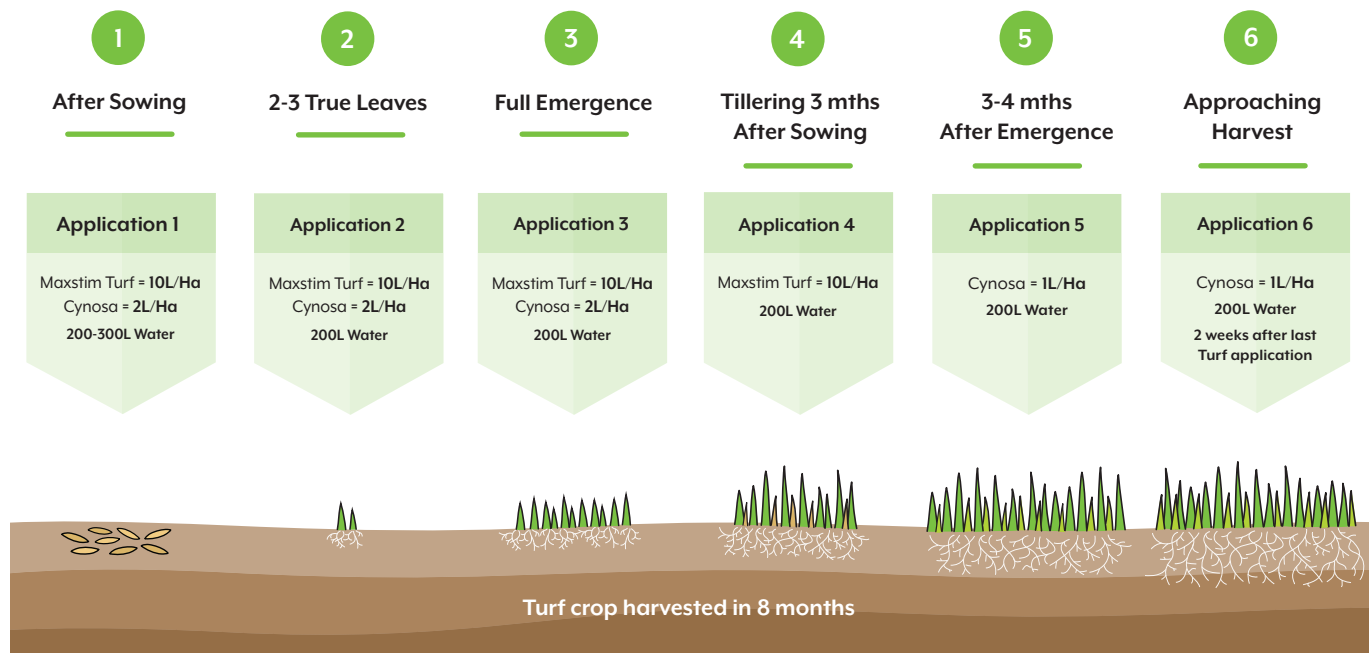

Close-up of the washed root mat demonstrating sod strength

Dense, interwoven roots, providing outstanding cohesion and pull strength.

Turf protocol

The Maxstim Turf application protocol is designed to support consistent root growth, strong sward development and faster time to harvest.

8-month turf demonstration

When were the fields sown?

The fields were sown in late October 2025, completing the 60ha block of sowing.

How long to harvest?

The first harvesting started in early June 2026 as the crops entered their 8th month of growing.

What growers and customers are seeing

- ✓ Reduced waste at harvesting has been recorded.
- ✓ Customers have noted the strength of the rolls and the vibrant colour of the crop.
- ✓ Landscaper customers are pleased with the quality and consistency of the turf sod rolls.

Flavonoid and polyphenol technology proven in the turf industry

- ✓ Increased margins from faster growing turf.
- ✓ Reduced time to harvest reduces unwanted stock carry over.
- ✓ Reduction of in-field waste.

Stronger turf makes for easy handling and reduced installation costs

Boost your turf production with Maxstim — apply early to support stronger growth, healthier turf, and improved profits.
